

## SWSC Spring 2025 Micro Soccer Field Map and Parking

Micro Fields are located on Rock Creek Powerlines Soccer Fields, Field #1. This is the closest field to Rock Creek Blvd. While there is a small parking lot immediately adjacent to the field, SWSC Micro families are encouraged to park in the overflow parking across the street. This will minimize congestion in the small lot and allow coaches (who have a lot of equipment to carry) and those with mobility concerns to park closer to the field. SWSC Micro families should not park on neighborhood streets. Parking along Rock Creek Blvd, while technically permitted, increases road congestion and may make it difficult for drivers to see families crossing the street. Parking further into the neighborhood (off Rock Creek Blvd) is not permitted. Parking on neighborhood streets (off Rock Creek Blvd) may result in neighbor complaints to THPRD and cars being towed. We must be respectful of the neighborhood or else we risk losing access to this field. Please note that all spectators should remain off the main field, even if their player's mini field is located on the field interior. This field is used for games and must be kept in playable condition.
